

SUCHAK NIRLA

Lalitpur, Nepal · niraulasuchak@gmail.com · [Github](#)

EDUCATION

Samriddhi College (TU affiliation)

Bachelors of Science, Computer Science and Information Technology

Bhaktapur, Nepal

03/2021 – 08/2025

- Volunteering Lead in Hult Prize 2022
- Participated in Techtrix Hackathon 2023

PROFESSIONAL EXPERIENCE

Nexbil Software Solutions, Full Stack Developer

11/2025 – 10/2026

Nepal

- Contributed to both frontend and backend development of the Dermedic webapp, implementing features for ecommerce site like cart management, authentication, filtering, sorting, pagination, building admin panels, etc.
- Built a full-stack laptop comparison platform (TypeScript monorepo) featuring an LLM-based web-scraping pipeline including a deterministic strength-weighted engine for head-to-head spec comparisons.
- Revamped Nexbil Software Solutions website in Next.js utilizing its features with dynamic UI features and admin panel with Payload CMS.
- Strengthened application security by implementing secure authentication flows, input validation, and role-based access control across the ecommerce and admin platforms, mitigating common vulnerabilities.

Yirifi.ai, Data Operations

02/2025 – 05/2025

Singapore

- Built intuitive user interfaces for monitoring and managing workflows, improving accessibility and decision-making for non-technical teams.
- Created automation scripts in Python and JavaScript to streamline frontend data handling, reducing repetitive manual tasks and enhancing user experience.
- Optimized data workflows and visualizations, ensuring clarity, consistency, and responsiveness across multiple platforms for QA and regulatory teams.

SKILLS

Languages: JavaScript, TypeScript, Python, Go
Frontend: React, Next.js, Tailwind CSS
Backend: Node.js, Express.js, FastAPI, Django, Gin
Databases: PostgreSQL, MongoDB, MySQL
Tools: Git, GitHub, Docker, Linux

PROJECTS

BookVerse: Online BookStore (MERN Stack + Blockchain)

- Developed a full-stack web application with an intuitive React.js frontend and scalable Node.js/Express backend.
- Integrated ERC-20 token smart contracts to offer blockchain-based discount systems.
- https://github.com/Suchak123/bookStore_2

UNIX Shell Emulator (Node.js)

- Built custom Read-Eval-Print Loop (REPL) for continuous command input and core built-in commands such as cd, pwd, echo, type, and exit.
- <https://github.com/Suchak123/UNIX-Shell-Emulator>

Feedback Board (Next.js)

- Developed a full stack application where you can provide feedbacks built in Next.js.
- Attractive UI, APIs to handle CRUD, upvotes, sorting and filtering, State management with Zustand and TanStack Query.
